SUMMARY OF RECENT ACTION

The Aviation Accreditation Board International (AABI) is required to inform the public about its accreditation decisions. One of the ways AABI does this is to provide the public with information about the accreditation decision process, the nature and scope of AABI accreditation activity and the importance and value of accreditation. AABI also provides the public with detailed descriptions of its accreditation policies and procedures by publishing its Accreditation Criteria Manual (Form 201) and Policies & Procedures Manual (Form 225), along with all the AABI forms, on its website: http://www.aabi.aero/forms.html (Paragraph 12[B] [5], 2010 CHEA Recognition Policy and Procedures).

Interim Report:
Mount Royal University
The Board action was to accept the institution’s response addressing Recommendations 1-4. The recommendations pertained to ensuring that OIAP and the Aviation Department track employment of students graduating from the Aviation Diploma program; develop a recurring system of evaluation that demonstrates achievement of goals and uses the results of said system to improve the effectiveness of the program; develop a system of continuous assessment and improvement and execute this program to effect improvements based on assessment; and review and rewrite program goals so they will appear to satisfy AABI program-specific criteria to include the development of a system of continuous assessment and improvement and execute this program to effect improvements based on assessment.
