SUMMARY OF RECENT ACTION

The Aviation Accreditation Board International (AABI) is required to inform the public about its accreditation decisions. One of the ways AABI does this is to provide the public with information about the accreditation decision process, the nature and scope of AABI accreditation activity and the importance and value of accreditation. AABI also provides the public with detailed descriptions of its accreditation policies and procedures by publishing its Accreditation Criteria Manual (Form 201) and Policies & Procedures Manual (Form 225), along with all the AABI forms, on its website: http://www.aabi.aero/forms.html (Paragraph 12[B] 5, 2010 CHEA Recognition Policy and Procedures).

Interim Report:
Middle Tennessee State University
The Board action was to accept the institution’s response, with no further reports required. The recommendations pertained to determination of Maintenance Management space needs; fostering an effective safety culture in the Maintenance Management and Technologies laboratories and fully participating in the formal Aviation safety program; creation of detailed published program educational goals that are mapped to departmental goals; assessment of Graduate General Outcomes and how the results are used to effect continuous improvement; implementation of the assessment plan with metrics that produce evidence, an analysis of the assessment results and specific plans to improve program effectiveness based on the analysis; and assessment of the five capstone courses for the Administration concentration.
