The Aviation Accreditation Board International (AABI) is required to inform the public about its accreditation decisions. One of the ways AABI does this is to provide the public with information about the accreditation decision process, the nature and scope of AABI accreditation activity and the importance and value of accreditation. AABI also provides the public with detailed descriptions of its accreditation policies and procedures by publishing its Accreditation Criteria Manual (Form 201) and Policies & Procedures Manual (Form 225), along with all the AABI forms, on its website: http://www.aabi.aero/forms.html (Paragraph 12[B] [5], 2010 CHEA Recognition Policy and Procedures).

**Interim Report:**
**The Ohio State University**
The Board action was to accept the institution’s response, with no further reports required. The recommendations pertained to implementation of the AABI General and Aviation Core Outcomes and how they are mapped to the courses within each program; implementation and use of a system to document feedback from industry to be utilized in the program evaluation and assessment process; implementation and use of a written assessment plan addressing all the areas required by AABI Criteria; and implementation and use of a written assessment plan that describes necessary timelines required by AABI.
