SUMMARY OF RECENT ACTION

The Aviation Accreditation Board International (AABI) is required to inform the public about its accreditation decisions. One of the ways AABI does this is to provide the public with information about the accreditation decision process, the nature and scope of AABI accreditation activity and the importance and value of accreditation. AABI also provides the public with detailed descriptions of its accreditation policies and procedures by publishing its Accreditation Criteria Manual (Form 201) and Policies & Procedures Manual (Form 225), along with all the AABI forms, on its website: http://www.aabi.aero/forms.html (Paragraph 12[B][5], 2010 CHEA Recognition Policy and Procedures).

Extension Granted: The University of Oklahoma

The Board voted to extend the University of Oklahoma’s current accreditation cycle expiration date from July 31, 2020, to August 31, 2020, for the following programs:

- B.S. in Aviation – Professional Pilot Track (AABI Flight Education)
- B.S. in Aviation – Aviation Management – Air Traffic Management Track (AABI Air Traffic Control)
- B.S. in Aviation – Aviation Management Track (AABI Flight Education)
- B.S. in Aviation Management – Non-Flying Track (AABI Aviation Management)

This extension is necessitated because those programs’ cycles expire in July 2020, and since AABI’s summer meeting that year will be held the first week of August in Calgary, Alberta, hosted by Mount Royal University, the Accreditation Committee and Board will not act on reaffirmations until August 5th and 7th, respectively. The extensions are a result of AABI’s schedule issues and are in no way the fault of the institution or programs.
