SUMMARY OF RECENT ACTION

The Aviation Accreditation Board International (AABI) is required to inform the public about its accreditation decisions. One of the ways AABI does this is to provide the public with information about the accreditation decision process, the nature and scope of AABI accreditation activity and the importance and value of accreditation. AABI also provides the public with detailed descriptions of its accreditation policies and procedures by publishing its Accreditation Criteria Manual (Form 201) and Policies & Procedures Manual (Form 225), along with all the AABI forms, on its website: http://www.aabi.aero/forms.html (Paragraph 12[B][5], 2010 CHEA Recognition Policy and Procedures).

Reaffirmation:
Southern Illinois University Carbondale
The Board action was to reaffirm the following program for a period of five years: A.A.S. in Aviation Flight (AABI Flight Education)

The Board accepted the institutional responses for Recommendations 1 and 3; however, an interim report is due to the AABI office January 6, 2020, for Recommendations 2 and 4, to provide evidence as specified below:

2. Provide adequate support personnel in the form of an additional academic advisor to satisfy Criterion 2.5.5.

4. Implement an assessment process that includes a written plan with documented results. This process MUST incorporate relevant evidence used to regularly assess the program. The results of the assessment MUST be used to effect continuous improvement of the program in each of these topic areas. The assessment plan MUST include: 1.) Time lines, metrics, and responsibilities of the assessment process; 2.) Evidence and how it is collected and analyzed; and 3.) How the assessment results are used to improve program effectiveness (Criteria 2.10.1 and 2.10.2).
