SUMMARY OF RECENT ACTION

The Aviation Accreditation Board International (AABI) is required to inform the public about its accreditation decisions. One of the ways AABI does this is to provide the public with information about the accreditation decision process, the nature and scope of AABI accreditation activity and the importance and value of accreditation. AABI also provides the public with detailed descriptions of its accreditation policies and procedures by publishing its Accreditation Criteria Manual (Form 201) and Policies & Procedures Manual (Form 225), along with all the AABI forms, on its website: http://www.aabi.aero/forms.html (Paragraph 12[B] [5], 2010 CHEA Recognition Policy and Procedures).

Interim Report:
Western Michigan University

The Board action was to accept the institution’s response, with no further reports required. The recommendations pertained to number of faculty as determined by student enrollment, adequate salaries for faculty specialists, facilities available to foster faculty-student interaction, pre- and post-briefing rooms sufficient in number to handle student-instructor pairs, clearly and accurately representing their current accreditation status, the Aviation safety program incorporating key SMS components, an active and engaged Advisory Board, and the comprehensive assessment plan.
