## RAISING THE STANDARDS OF AVIATION™

## Annual Meeting

## INDUSTRY/Educator FORUM

Hosted by

## The Ohio State University

July 15, 2021

Columbus, OH, USA

## Panel 1: Capt. Carl Davis, Boeing Global Services, Moderator

### Keeping Business Alive During COVID-19 Crisis

Pfahl Conference Center, Room 140

**Charge:** Airlines, OEMs, and airports, faced unique operational challenges during Covid. Customers are becoming accustomed to virtual technologies for meetings, suggesting air travel and shipping may be different in the future when the pandemic eases. We suggest speakers and panelists concentrate on how the organization and individuals adapted to and managed this disruptive global event. Please discuss not only what happened and how organizations coped and adapted, but also how organizations are anticipating and planning for an uncertain future. Include or close with suggestions that educators may integrate into curricula and laboratories so that future graduates are well prepared with needed competencies and skills for their careers, as well as agility and attitudes that prepare them to cope with shocks that have characterized aviation many times in the past.

*Capt. Andy Allen, ORD Assistant Chief Pilot, United Airlines; Mr. Tyler Tenbrink, Talent Acquisition and Development Director, Piedmont Airlines; Capt. Kisa Wiley, SEA Base Chief Pilot, Horizon Air; Mr. Steve Brown, COO, National Business Aviation Association (NBAA); Ms. Kate Fraser, Safety Assurance Director, NetJets Inc.; and Capt. Carl Davis, Air Crew Operations Director, Boeing Global Services*

## Panel 2: Mr. Peter Morton, Peter M. Morton Consulting, Inc., Moderator

### Emergent & Disruptive Aviation Technologies & Businesses

Pfahl Conference Center, Room 140

**Charge:** We suggest speakers and panelists concentrate on how their organization and individuals are approaching UAM/AAM disruptive technology and business. Airspace sharing & management and autonomous operation are vital for this new sector of aviation, therefore speakers are invited to comment on new SMS and Failure Mode and Effects Analysis (FMEA) methods that might be included in academic and laboratory education, as well as possible relevant university research. Please include or close with suggestions that educators may integrate into curricula and laboratories so that future graduates are well prepared with competencies and skills as well as the agility and attitudes that prepare them to cope with emerging technologies and business models. Please also consider suggesting new criteria that AABI may consider to cover accreditation of programs that focus on UAM/AAM.

*Mr. Steve Brown, COO, NBAA; Dr. Pat Anderson, Aerospace Engineering, Embry-Riddle Aeronautical University; and Mr. Greg Bowles, Head of Government and Regulatory Affairs, Joby Aviation*

## Educator Responder Panels:

**Mr. Mike Gaffney, Southeastern Oklahoma State University, Moderator**
