Aviation Accreditation Board International July 16, 2021

SUMMARY OF RECENT ACTION

The Aviation Accreditation Board International (AABI) is required to inform the public about its accreditation decisions. One of the ways AABI does this is to provide the public with information about the accreditation decision process, the nature and scope of AABI accreditation activity and the importance and value of accreditation. AABI also provides the public with detailed descriptions of its accreditation policies and procedures by publishing its Accreditation Criteria Manual (Form 201) and Policies & Procedures Manual (Form 225), along with all the AABI forms, on its website: <http://www.aabi.aero/forms.html> (Paragraph 11[A] [1], 2018 *CHEA Recognition Policy and Procedures*).

Accreditation:

Özyegin University

The Board action was to grant initial accreditation for the following programs for a period of five years:

B.Sc. in Professional Flight (AABI Flight Education)

B.Sc. in Aviation Management (AABI Aviation Management)

The Board specifically noted and stressed that the requirement to comply with Criterion 5.5.5.d.2, for this institution and this accreditation was waived.
