

**Professionalism and Ethics Committee:** The Professionalism and Ethics Ad Hoc Committee was established by the AABI chairman to respond to issues that may arise from Section 206 of the “Airline Safety and Federal Aviation Administration Extension Act of 2010” titled Flight Crewmember Mentoring, Professional Development and Leadership. The Act required the FAA to develop procedures for Part 121 carriers to establish flight crewmember mentoring programs, establish flight crewmember professional development committees, establish or modify training programs to accommodate substantially different levels and types of flight experience and to incorporate leadership and command training for all flight crewmembers. The committee was tasked to draft official AABI responses to Aviation Rulemaking Committees (ARC), Notices of Proposed Rulemaking (NPRM), and FAA Regulations (FAR) about Professionalism and Ethics. The committee was also tasked to review documents stemming from the Act, and to make recommendations to the Criteria and Guidance committees that might enhance professionalism and ethics in AABI accredited programs.
